Where elegance endures the elements

Powered by the transforming force of Mimetech Stone, Mimetech Outdoor drives a new evolution. One that ventures beyond interiors and embraces the outdoors.

Inspired by the unstoppable ability of nature to transform, adapt, and endure, these surfaces are crafted to meet the challenges of the open air. Just as landscapes shift with time, light, and weather, they're designed to respond to the elements, delivering lasting performance.

At the core of this innovation lies Phi Outdoor, a cutting-edge manufacturing technology that enables the creation of surfaces specifically engineered to withstand outdoor conditions. Each slab offers exceptional resistance to solar radiation, thermal variation, and environmental wear, while preserving their color, integrity, and visual appeal over time. They're not just made for the outdoors, they're made to last in them.

Crafted with premium minerals and refined through innovation and expertise, Mimetech Outdoor surfaces capture the complexity and beauty of natural stones, effortlessly recreating the subtle textures, hues, and movements found in them.

An evolution rooted in nature. Perfected for the open air.

phi OUTDOOR² Technology

Developed through years of expertise and continuous innovation, **Phi Outdoor Technology** combines aesthetic fidelity with advanced functional resilience. A decisive step forward in meeting the demands for surfaces designed specifically for exterior design.

Each slab is crafted using **premium minerals**, carefully selected and extracted from our own quarries, to achieve exceptional purity, structure, and strength. The result is a **non-porous**, full-body surface with remarkable durability and an **authentic natural appearance** that rivals even the most exclusive stones.

Thanks to this technology, Mimetech Outdoor surfaces offer outstanding UV resistance, maintaining their color and finish even after prolonged exposure to sunlight. Their premium composition ensures a **low water absorption** rate, providing enhanced resistance to stains, weathering, and environmental agents. The surfaces are also designed to withstand daily wear and external abrasion, delivering superior **scratch resistance**.

Phi Outdoor is more than a production method, it is the core of a material made to endure, to protect, and to inspire. A seamless union of nature and engineering, designed to elevate outdoor spaces with both beauty and functionality.

Nano Enhancement of Surfaces (NEOS), is a high-performance stain and substance repellent technology developed by our engineers. Invisible to the naked eye, NEOS has been scientifically formulated to produce a hybrid protectant with physical characteristics that resists staining, keeps surfaces clean and guards them against everyday wear and tear, weathering, and environmental agents. With NEOS, Mimetech Outdoor surfaces are safely protected against the most common household chemicals and external abrasion.

Stain Resistant • Food Safe • Durable • Easy Maintenance • Chemical Resistant. This patented technology has been specifically developed to ease the cleaning and maintenance with a minimum effort, keeping your surfaces look new for longer. Only NEOS technology protects your countertops with a permanent bond which lasts forever, making Mimetech Outdoor surfaces the most durable product in industry.

A tribute to elemental purity. This design showcases a luminous white surface that radiates clarity and calm, even under open skies. Its ultra-fine grain and uninterrupted purity lend a sense of serene sophistication, making it a harmonious backdrop for outdoor spaces—balconies, terraces, and garden kitchens—where elegance meets endurance. Designed to reflect natural light with subtle grace, this surface elevates exteriors with a clean, modern aesthetic.

Bring understated elegance to outdoor spaces with this light grey canvas infused with delicate marbling. The subtle interplay of smoky wisps and mineral-like veining evokes the organic beauty of weathered rock, refined for contemporary “alfresco” living. Ideal for patios, poolside counters, or garden kitchens, this surface harmonizes effortlessly with open-air architecture.

FOG zQ1468

Finished: Matt
Size: 3200 x 1600 mm
Thickness: 20 mm | 30 mm
Bookmached: No

This design unfolds in a smooth, pale grey tone kissed with mineral-like textures. Its subtle, weathered elegance makes it a versatile choice for outdoor living, gracefully complementing everything from sleek urban rooftops to serene garden pavilions. This proposal delivers a grounded yet contemporary finish that feels both organic and refined.

Evoking the raw sophistication of quarried stone, ZQ1469 presents a cool grey base animated by subtle, smoky veining. Its moody tone and mineral texture make it a striking choice for outdoor environments that embrace contrast and depth. Ideal for shaded courtyards or bold kitchen islands beneath the sky. Durable and elemental, this design will add a touch of refinement to any outdoor design project.

With its rich graphite tone and fine-gray appearance, this color makes a powerful statement in any outdoor setting. Reminiscent of volcanic stone, this design carries an innate strength, perfect for high-contrast exteriors or expansive terraces. Its deep, uniform hue offers a grounding presence while blending effortlessly with both lush landscapes and urban minimalism.

A design that captures the essence of cloud-kissed stone with its luminous white base softly interwoven with pale, silvery veining. The delicate patterning brings movement and airiness to outdoor settings—ideal for bright terraces, breezy balconies, and poolside dining. Its light-reflective character enhances natural daylight, creating fresh, inviting spaces that feel both expansive and refined.
